

REDSTAR

PROTECT

PRODUCT FEATURES

- Provides outstanding, broad spectrum disease and insect suppression.
- Contains thiabendazole, a highly effective compound against soil borne diseases.
- Contains colorant level higher than industry standard for radiant appearance.
- New generation formulation is seed and equipment friendly - no sticky beans or drum clean out.
- Exceptional seed safety with no negative PGR effects common with other triazoles.
- PRO Tect applies the correct hormones at the right ratios to provide the highest probability of all the seeds emerging from the ground at the same time.
