

# REDSTAR PROTECT CORN

REDSTAR Protect Corn is a uniquely designed seed treatment that provides essential nutrients and biostimulant additives which can maximize early seedling vigor and crop development, for maximizing yield potential

## Features & Benefits of REDSTAR Protect Corn

- Combination of 5 essential nutrients placed on the seed for seedlings to maximize early and efficient uptake
- Blend of extracts including amino acids, glucose, and vitamins to induce enzyme activity, enhance germination and early growth
- Includes a balanced ratio of Cytokinin, Gibberellic Acid, and Auxin to stimulate germination and early growth

<b>Phosphorus</b>	0.70%
<b>Manganese</b>	0.05%
<b>Boron</b>	0.50%
<b>Iron</b>	0.10%
<b>Zinc</b>	0.50%

Every seed with the same chemical message & the same food source creates the most evenly emerged stands.

**REDSTAR Protect Corn Use Rate: Corn - 2.4 fl. oz/cwt**

**REDSTAR**  
**PROTECT**  
 CORN

**Enhancing Emergence!**

**Treated**

**Day 1: 29 Plants**  
**Day 2: 31 Plants**

**Untreated**

**Day 1: 22 plants**  
**Day 2: 29 plants**  
**Day 3: 31 plants**

*Both entries were treated with standard fungicide and insecticide*

*Planting population: 31,000 seeds per acre*

- Uniform emergence is a key factor in driving higher yields
- An uneven or reduced stand can never be improved
- Notice the difference **REDSTAR Protect Corn** can provide in establishing a more uniform stand above and beyond today's standard treatment

**Uniform Emergence Results in Greater Yield Potentials**

1 Day Emerged	+24 Hours	+48 Hours	+72 Hours	+96 Hours	+110 Hours
100%	89%	74%	68%	61%	61%
