

★REDSTAR

PROTECT

COMPLETE

PRODUCT FEATURES

- Provides outstanding, broad spectrum disease and insect suppression
- Contains thiabendazole, a highly effective compound against seed and soilborne diseases
- Contains colorant level higher than industry standard for radiant appearance
- New generation formulation is seed and equipment friendly - no sticky beans or drum clean out
- Exceptional seed safety with no negative PGR effects common with other triazoles

- **REDSTAR PROTECT COMPLETE** contains a single component, naturally occurring, non-pathogenic bacterial - *Bradyrhizobium japonicum*- which accelerates the process of Biological Nitrogen Fixation.

- **REDSTAR PROTECT COMPLETE** provides a cellular food source, contains a super systemic seedling protector, and provides season-long disease suppression.

REDSTAR PROTECT COMPLETE combines a multi mode of action biostimulant, strong chemistry, long proven SAR technology to suppress soybean disease symptoms, & even under high disease pressure. Target diseases of SDS, White Mold, Rhizoctonia, and other late season diseases.
