

REDVITA 43

NEXT-GENERATION CROP INPUT PROVEN TO IMPROVE YIELD IN CORN

REDVITA 43 is a next-generation crop input proven to improve yield in corn. Formulated to boost the natural power of beneficial soil microbes, REDVITA 43 stimulates microbial activity, increases nutrient use efficiency and enhances plant vigor.

Consistent, cost-effective, easily applied and field-proven. Multiyear University of Illinois trials found that REDVITA 43 biostimulant consistently increased corn yields up to 7 bu/acre* when combined with liquid starter fertilizer, compared to starter alone. This remarkable yield boost is achieved with an expected MSRP of less than \$8/acre, making REDVITA 43 one of the more cost-effective crop inputs in the field.

REDVITA 43 OPTIMIZES NUTRIENT USE EFFICIENCY

Starter Fertilizer: 4 gal/ acre ammonium polyphosphate (APP; 10-34-0); NeoVita 43: Applied at 4 lb/acre (.75-1.00 gal/acre) total monosaccharides. University of Illinois trials.

REDVITA 43 BIOSTIMULANT DELIVERS UP TO 7 MORE BUSHELS FOR LESS THAN \$8/ACRE

PROMOTES NUTRIENT AVAILABILITY

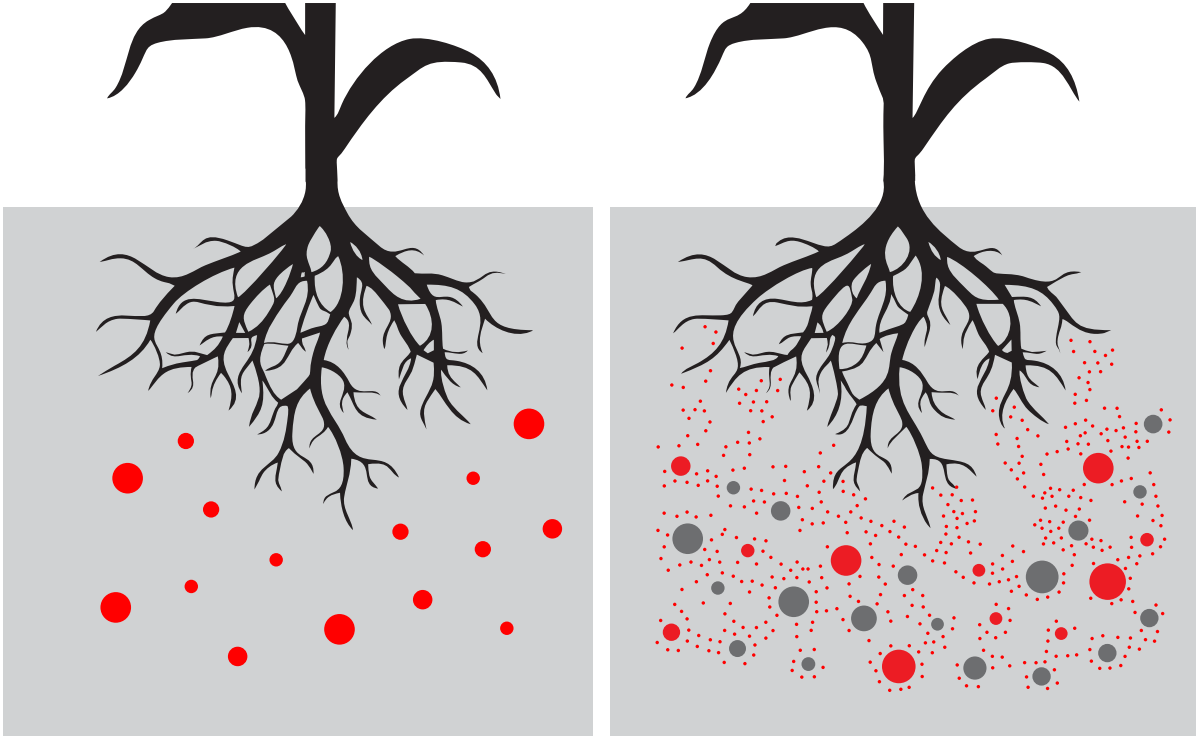

Specially formulated to closely mimic the plant root exudate that supports soil microbial activity, REDVITA 43 works by supercharging the rhizosphere, promoting nutrient availability and uptake by the plant. For farmers using in-furrow treatments at planting, REDVITA 43 is an easy way to boost yields and optimize fertilizer use efficiency.

EASY APPLICATION

REDVITA 43 can be applied at a rate of one gallon/acre with liquid starter fertilizer at planting and does not require additional mixing or special handling. It is available in 275-gallon totes through REDSTAR and participating ag retailers.

REDVITA 43 OPTIMIZES NUTRIENT USE EFFICIENCY

REDVITA 43 is formulated to mimic plant root exudates to enhance soil microbial activity, increase plant-available nutrients and boost uptake.

IMPROVES FERTILIZER ROI

REDVITA 43 provides a needed energy source to soil microbes, boosting their activity to promote nutrient availability and increase fertilizer use efficiency.

BOOSTS YIELDS

Multiple years of university research has shown REDVITA 43 consistently increased corn yields up to 7 bushels / acre when used in combination with starter fertilizer, compared to starter alone.*

EASY TO USE

Proven compatibility and synergy with 10-34-0 and high ortho-starters like Maxxumstar+ and RED ELITE+. REDVITA 43 is available as a ready-mixed solution for in-furrow and 2x2 application.
